

Case Study

Modernizing the IT landscape of Hoist Finance using Microsoft Azure

Client

Hoist Finance is headquartered in Stockholm, Sweden and operates in eleven European countries as a debt restructuring partner to international banks and financial institutions. It specializes in the acquisition and management of non-performing consumer loans.

Business Challenges

- Hoist Finance's legacy infrastructure and distributed data centers were not conducive for a digital transformation journey. The company needed to re-evaluate its IT infrastructure to strategize this transformation.
- It also recognized the need for a new IT strategy to meet the ever-growing business needs. The solution was to have a robust, cost-effective, secure, and future-ready platform that can host their highly critical business applications and services aligned with their BCP and DR strategy.
- Hoist Finance adopted a cloud-based infrastructure leveraging Microsoft Azure, setting the stage for sustainable growth.

LTIMindtree Solution

LTIMindtree, a Tier-1 Expert MSP Partner with Azure, provided an end-to-end solution which covered hosting, migration, and managed services.

- ✔ Performed detailed cloud readiness assessment using RapidAdopt and provided a business case to accelerate business decisions
- ✔ Reviewed the infrastructure and applications architecture and offered a roadmap for seamless migration
- ✔ Built a future-ready platform with a well-architected and enterprise-scale secure landing zone in Azure using LTIMindtree SmartDeploy aligned with Microsoft CAF guidelines
- ✔ Migrated all applications in an agile way to the cloud with no disruption to services
- ✔ Performed right-sizing of workloads by leveraging cloud-native services
- ✔ Implemented multi-region disaster recovery solution using Azure Site Recovery (ASR) which resulted in improved operational resilience for all production workloads

Business Benefits

Hoist Finance's new digital transformation capabilities are accelerating and continually improving the user experience. The cloud-based modernized infrastructure and future ready platform created for a transformation roadmap meets their business needs and provides benefits such as

35%

reduction in overall TCO

Optimal additional savings
by effective reuse of licenses

Cost-effective Disaster
Recovery solution

Reduction in DC footprint
with migration of 80% of
apps in the cloud

Increased business agility
with improved SLAs to
business

Improved automation due
to adoption of cloud

Technologies Used

- ✓ Azure cloud native tools such as Azure Blueprints, Azure Monitor, Bastion, Azure Firewall & Azure Migrate
- ✓ Azure Cloud Services like VMs, WebApps, WVD, and data platforms like Azure SQL, ADF and so on
